

# Paweł Boroń

< Student IT />

## Education

### • IT engineer

University of  
Silesia  
2021 - Present

### • IT Specialist

Techniczne  
Zakłady Naukowe  
2017 - 2021

## Experience

### Junior Fullstack Developer

7SUN Czeladź 06/2024 - 10/2024

- Creation of a Node.js scraper integrated with artificial intelligence, used for processing datasheets and generating HTML tables.
- Development of a new store on WordPress and WooCommerce, utilizing PHP, JS, and SCSS.
- Creation of an application in Node.js that communicates with the Mail Hunter API, processes the retrieved data, and then stores it in a MySQL database. Due to the large volume of data and tables, optimization of tables and queries was necessary.
- Applying best practices in working with WooCommerce and WordPress, including creating custom plugins and adapting WordPress themes.
- Working with APIs using tools like Postman and Insomnia.

### • Technical Specialist

Promitel Chorzów 11/2023 - Present

- Created a newsletter using technologies such as JS, REACT, SCSS/CSS, Bootstrap, PHP, and MySQL. The newsletter is responsive (RWD).
- Developed a browser extension that extracts product data from a website and sends it to Node.js for processing and saving to a specific folder (JS, Node.js, Express).
- Built a simple launcher in Node.js and Electron that allows selecting the appropriate version of software for managing CCTV cameras.
- Improved descriptions and content on websites (WordPress).
- Optimized websites for search engines (SEO).
- Implemented the Akeneo PIM system (e-commerce).

### • Junior Frontend Developer

Bacom Sosnowiec 07/2023 - 08/2023

- Developed a courier ordering module using JavaScript and ExtJS.
- Managed database operations with MySQL.
- Worked with SVN for version control (Subversion).
